

## Look at the Heavens

David often slept outside at night when he cared for his father's sheep. He watched the moon and the stars and thought about God. Read Psalm 8 and see what David thought when he looked up.

Some clear night go outside and look at the stars. Without a telescope you can see just over 1,000 stars. If you had looked through the first telescope, made many years ago by Galileo, you would have seen over 3,000. With today's big telescopes you can see millions of stars in the sky! It's good to lie on your back, look at the stars, and think about how great God is.

# Live It!

**Psalm 8:1-5**
